

# Velvet effect, intense hydration, deep protection.

## DEEP MOISTURISING CREAM

### ADVANTAGES

A specific treatment that gives your skin the hydration it needs, for a healthy, smooth and velvety epidermis. The Deep Moisturising Cream acts on the epidermis, preventing water evaporation and reinforcing the hydrating effect of the corneal layer.

### DIRECTIONS FOR USE

Apply daily, preferably after your shower or bath, with a gentle and regular massage to activate micro circulation, decongest tissues and re-establish lymphatic flow. Constant massage concentrated on certain crucial areas increases skin temperature and improves the penetration of the active principles.

### ACTIVE INGREDIENTS

*Wheat germ oil and sunflower seed oil with emollient and moisturising properties; Fluxhydran LS 9487 (sucrose, serine, arginine, PCA, alanine, threonine, Mourera fluviatilis extract) strengthens the hydrating effect of the corneal layer. Aloe vera moisturising gel.*

DERMATOLOGICALLY TESTED FORMULA.  
FREE OF ANY FORMALDEHYDE DONORS OR PARABENS

<b>QUANTITY</b> 250 ml	<b>IDEAL FOR:</b> Body cream with intensive action to solve all of your skin's hydration and protection needs.
