

Firmer, protected skin.

MOISTURISING CREAM

ADVANTAGES

Created to ensure maximum skin hydration, reinforce the barrier effect and protect the skin against external aggressions, the **Moisturising Cream** is a soft and velvety emulsion that immediately provides well-being, luminosity and comfort, visibly reducing signs of dehydration. Thanks to the presence of innovative HYALU4DEEP, this cream can effectively quench the thirst of the tissues by acting intensely on all skin layers. The skin immediately returns to its comfort and softness, and appears smoother, more compact and elastic every day - filled out. Suitable for all skin types, perfect for dehydrated skin.

DIRECTIONS FOR USE

Apply morning and/or evening on the clean and toned faced, with a gentle massage. Avoid the area around the eyes.
